# KE-430HX-0**■** KE-430HS-0■

Light materials Heavy materials

Model		KE-4	30HX		KE-430HS						
	-01	-03	-05	-0K	-03	-05					
Application	Light materials	Medium materials	Heavy materials	Knitted materials	Medium materials	Heavy materials					
Lubrication		Sem	i-dry		Minimum I	ubrication					
Max. sewing speed				3,300	sti/min						
Sewing area				Max.40>	<30mm <sup>*1</sup>						
Dimensions of buttons that can be Sewn				-	_						
Stitch length				0.05~	12.7mm						
Feed mechanism			Y- θ intermitten	t feed mechanism	(pulse-motor driven mechanism)						
No. of stitches	Variat	ole (Refer to "Pro	gram List" for det	tails on the number	er of stitches for sewing patterns that	at are already preset.)					
Max. No. of stitches				5,000 stitc	hes/pattern						
Work clamp lifter				Pulse motor	drive system						
Work clamp height / Button clamp height		Max. 17mm									
Rotary hook			Shu	ttle hook (double s	shuttle hook, optional)						
Digital tension		Standard	equipment		_						
Thread wiper				Standard	equipment						
Thead trimmer				Standard	equipment						
Thread nipper	-01,-0	3,-0K:Standard e	quipment (-05:0	Option)	Opti	on					
Data storage method		lı	nternal flash mer	nory (Data additio	n is available with external memory)						
No. of cycle programs			3	0 cyc <b>le (</b> 50 progra	ams for each cycle)						
N. C. III				89 sewing pattern	ns are set already						
No. of stored data	(Up to 500 patterns can be added. Total number of stitches of stored data which can be added is within 500,000.*2)										
Motor			,	AC servo motor 55	50W (Direct Drive)						
Weight		Machine	head: Approx. 58	3kg, Operation par	nel: Approx. 0.5kg, Control box: App	rox. 7kg					
Power supply	Single-phase 1	e-phase 100V/220V, 3-phase 220V/380V/400V 400VA (For single-phase 100V and 3-phase 380V/400V, the trans box is required.)									

<sup>\*1</sup> Use the optional 50X40 SEWING AREA SET (SB7777001) for wide area of 50x40 mm

<sup>\*2</sup> The number of sewing patterns and number of stitches that can be recorded will vary depending on the number of stitches in each sewing pattern

KE-430HX/HS, BE-438HX is compliant with the RoHS Directive(the restriction of the use of certain hazardous Compliant substances in electrical and electronic equipment) which came into effect in the EU in July 2006.

-Photographs are for illustration purpose. They may not represent actual operating conditions and may display optional parts.

Please read instruction manual before using the machine for safety operation. -Product specifications are subject to change for improvement without notice.

Brother has established voluntary environmental standards for roducts and created the "Brother Green Label". KE-430HX/HS, BE-438HX is certified as an environment-conscious sewing machine according to the "Brother Green Label" standard.

# KE-430HX

Electronic Direct Drive Lockstitch Bar Tacker (Short Remaining Thread Spec.)

# **KE-430HS**

Electronic Direct Drive Lockstitch Bar Tacker (Short Remaining Thread Spec.)

With the world's top-class sewing speed and prevention of thread breakage with a Needle Cooler, the machine has increased productivity. It also has superior sewing quality, usability, and reduces maintenance cost.

- Productivity Improvement by World's Fastest Sewing Speed and IoT
- Beautiful and Highly-reproducible Sewing Quality
- Superior Usability as Everyone can Use Easily and Reliably

# World's Fastest Sewing<sup>\*1</sup>

With the world's top-class sewing speed and prevention of thread breakage with a Needle Cooler, the machine has increased productivity. It also has superior sewing quality, usability, and reduces maintenance cost.

\*1 Electronic Direct Drive Lockstitch Bar Tacker, According to Brother survey, 08.2017

### Productivity Improvement by World's Fastest Sewing\*2 and IoT

Overwhelmingly superior productivity with sewing speed 3,300sti/min

**KE-430H provides 3,300sti/min (BE-438H: 2,800sti/min)** and contributes to enhance productivity,

**Needle Cooler prevents** 2 Needle State 1 thread breakage

Needle Cooler\*3 prevents thread breakage, it enhances actual sewing speed by 10% compared with current model, F series. It provides high productivity and quality.

Productivity improvement with lot

**NEXIO** series are IoT applicable models. The visualization by connecting sewing machine and computer technology enables the customer to analyze, manage processes, speed up productivity improvement and maintenance work.

Reduction of disposition of thread ends (short remaining thread)

Thread trimmer driven by stepping motor cuts the thread shorter, stable and quietly than conventional mechanical thread trimmer. It reduces hand trimming work after sewing.

Also, the thread nipper, equipped as standard\*4, minimizes thread cast off at sewing start and bird's nest.

\*2 Electronic Direct Drive Lockstitch Bar Tacker, According to Brother survey, 08.2017

\*3 KE-430HX \*4 KE-430HX-1, -3, -K spec.

### **Beautiful and Highly-reproducible Sewing Quality**

Thread tension can be set as numerical value by digital tension

You can adjust the tension appropriately for the material being sewn without relying on individual feel. It provides higher production management and sewing reproducibility.

Clean sewing without Oil staining

HX models are semi-dry type and they supply constant clean oil only to the shuttle hook, there is no concern of oil staining. HS models are minimum lubrication and they supply limited oil only to the needle bar and thread take-up to prevent oil from being dispersed, realizing clean sewing for your valued product.

## Superior Usability as Everyone can Use Easily and Reliably

**User- intuitive Color LCD** with touch panel

**Equipped the Color LCD with touch panel that indicates** display items with illustration icons, offering use-intuitive operation. It is very easy to set the cycle program, along with sewing patterns, sewing speed, and magnification. The upper thread tension can be stored easily as user programs.

**USB** port is equipped

Data transfer to other sewing machines and software upgrade can be done easily with USB memory.

Reduction of maintenance cost as there is no need for grease-up work.

There is no need for grease-up work at the connecting rod because it adopts oil lubricating, and reduces maintenance work.

Low noise and low vibration for stress-free operation

The noise and vibration are minimized by reducing impact during thread trimming. Operators can sew conformably without fatigue and stress.

Wide variety of sewing capability due to enlarged sewing area (50x40mm)

Sewing area can be expanded from 40x30mm to 50x40mm as option. It enables to sew more applications such as hook and loop fastener and applique.

# Sewing Patterns List (KE-430H)

The sewing patterns shown below have been preset into the sewing machine and can be selected according to specifications. (Any sewing pattern is available as long as it is within the work clamp and feed plate in size.)

Use the work clamp and feed plate that match the respective sewing pattern selected.

For medium materials (-03)

If you want to sew a sewing pattern other than standard sewing patterns, you can create your original pattern using PS-300B. Consult with your local Brother sales office for details.

### Peripheral Equipment and Option

#### •Sewing data programming software PS-300B

With the KE-430H, BE-438H sewing can be done using sewing patterns other than preset ones. PS-300B is software for creating sewing patterns on a personal computer.

## •50x40 Sewing area set (SB7777001) (SB77770E1:for WEEE)

Sewing area can be expanded to 50x40mm. It enables to sew more applications such as hook and loop fastener and applique.

#### •Double-pedal foot switch (SA6038101)

The right and left pedals are provided for separated operation functions. This allows even more precise positioning of materials.

When using the Double-pedal foot switch, Conversion Harness Foot SW (SB1565001) is necessary.
